

• Only support main R process

• *i* Not for production!!!

But what about...

• LocalRcode profiling

• Display memory usage

• Reployed/redeploy

• Full dependency graph

reactlog

• {proffvis}

• {readatlog}

But what about...

- {profvis}

- Local R code profiling
- Displays memory usage

- {reactlog}

- Replay local reactivity
- Full dependency graph

- Only support main R process

- **Not for production!!**

Improve performance
